Summary

Software Developer with 1.2+ years of experience building scalable web applications using **Java, Spring Boot**, and **Spring Security**. Experienced in designing and developing **REST APIs**, optimizing database queries, resolving backend performance bottlenecks, and integrating frontend interfaces with backend services. Strong foundation in **OOPs, DBMS, and Data Structures & Algorithms**.

Skills

Languages: Java, JavaScript, Python

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Servlet, JSP, Node.js, Express.js, REST APIs

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Shadcn/UI

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: Microsoft Azure, Git, Github, Postman, Vercel

Technical Fundamentals: Data Structures & Algorithms (100+ Problems Solved), OOPs, DBMS, Design Patterns

Experience

Software Developer Intern *Jan 2025 – Feb 2026*
Perceptive Solutions Inc

- Designed and implemented **REST APIs** using **Spring Boot**, following MVC architecture with clean separation of Entities, Services, and Controllers.
- Identified and resolved the **N+1 query problem** in JPA/Hibernate, significantly reducing database load and improving page response times.
- Debugged production-level issues by analyzing backend logic, API request/response flows, and database queries, improving overall system stability.
- Collaborated with the frontend team to integrate backend APIs with React.js components.

Projects

Internal Management Portal *(Perceptive Solutions Inc)*

- Resolved **N+1 query issues** in Hibernate-backed APIs, achieving 5x faster page loads for data-heavy management modules.
- Developed and exposed **RESTful APIs** consumed by the React.js frontend, ensuring clean request/response contracts.
- Built a reusable **data table** frontend component integrated across **10+ pages**, reducing duplication and improving maintainability.
- Fixed critical production bugs and improved backend stability through systematic debugging of API and database layers.
- **Technologies Used:** Spring Boot, Spring Security, JPA, PostgreSQL, React.js, Tailwind CSS.

ByteBlog – Blogging Platform

- Built a full-featured blogging platform with post creation, editing, deletion, and nested commenting, backed by a Spring Boot **REST API**.
- Implemented secure user authentication using **Spring Security**, covering login, registration, OTP-based email verification, and password reset via secure token link.
- Designed the database schema using JPA/Hibernate with MySQL, applying proper entity relationships and query optimization.
- **Technologies Used:** Spring Boot, Spring Security, JPA, Hibernate, MySQL, React.js, Tailwind CSS.

Education

Bachelors in Information Technology (BSc IT) *2023 – 2026*
Mumbai University
